DATA DESCRIPTION FOR MY CAPSTONE PROJECT

To solve this problem, we will need below data:

● List of neighbourhoods in Toronto, Canada

● Latitude and Longitude of these neighbourhood's

● Venue data related to Indian restaurants. This will help us find the

neighbourhood's that are more suitable to open an Indian Restaurant.

EXTRACTING THE DATA

● Scrapping of Toronto neighbourhood's via Wikipedia

● Getting Latitude and Longitude data of these neighbourhood's via

Geocoder package

● Using Foursquare API to get venue data related to these

neighbourhood's
